Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Nagasu et al, EP 1103263 A2 cited by applicants. The instant process and apparatus for production of a cyclic polylactic acid are disclosed under Production Example in par.{0018} to [0021]. Note the reaction mixture is stirred by passing nitrogen gas therethru.

The use of the material is basically the same as in the instant application. However the statement of use does not distinguish in this method of making and apparatus for making a compound.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Takada et al, EP 1213021 A1 cited by applicants. See par. 0023 to 0026. Note step-wise pressure lowering and step-wise temperature raising are taught.

Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nagasu et al above and Takada et al, above. Both teach very similar processes and the step-wise teachings of the latter render it obvious to use that feature in the inert gas stirred process of the former.
